

16 Hour Bridge Resource Management for Pilots Refresher

COURSE DESCRIPTION

This is a professional workshop designed for Pilots and Docking Masters. Using group facilitation techniques, the workshop reviews: situational awareness, error chain analysis, effective communications, evaluating and utilizing team resources, and the Master-Pilot relationship. This course also updates participants on the latest regulations, technology and BRM techniques that may affect their work.

This workshop can be conducted at the client or Pilot Association's location, or MSI's simulator complex.

COURSE APPROVAL

This course has been approved by the American Pilots Association and meets the APA's *Guidelines for Renewal Courses for Bridge Resource Management for Marine Pilots*.
